***"It always seems impossible
until it's done."
- Nelson Mandela***

Hello FFA Members!

What's one of the weirdest things that you've ever done? When I was an eighth-grade student, that "weird" thing was joining FFA. I grew up in a semi-rural area and at the beginning of high school, my friends were joining the organization, so I figured that I might as well too. My idea of FFA at the time turned out to be the biggest misconception that I have ever had.

The FFA is an amazing organization with benefits that reach across the world. As an organization, we can all work together every day in different locations, ways, and times to make the greatest impacts possible. We can advocate for agriculture, recruit students, explain the National FFA Organization to others, stand up when no one else will, and most of all, contribute to an organization that promotes growth and leadership in everyone.

The FFA has provided me with more skills than I could ever imagine. From the ability to speak in front of any crowd, all the way to (somewhat) understanding floriculture, I have become knowledgeable in things I never knew existed. Everyone needs to have access to the National FFA Organization's opportunities. Now, I have a passion to work for an organization that is greater than me, as well as the desire to advocate for the world's number one industry. It is my mission to work to the best of my ability both by myself and with others to benefit our organization as well as its members and the world around us. The power of FFA to influence lives and guide personal development is unprecedented. Thank you for your consideration, and I look forward to meeting you!

Sincerely,

Lee Wesenberg
Umpqua District Reporter
Sutherlin FFA Treasurer
